

Unique maintenance  
products for stainless steel

Problems with flash rust or  
contaminations are completely over!

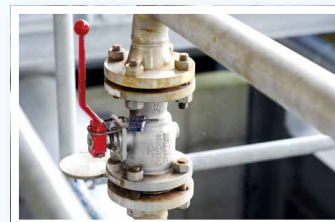

# Innosoft B570

Innosoft B570 is a special deep cleaner that removes oxides or rust from stainless steel. Innosoft B570 is suitable for the intensive cleaning of contaminated surfaces like flash rust and other rusty areas, also known as 'tea-stains'. But also for preventive use; from research has become clear that materials which has been treated with Innosoft B570, better withstand corrosion.

Innosoft B570 does not attack the metal, it is gentle for metals, but very aggressive to oxides and dirt. This product is unique because it is 100% organic, so it is without danger to people and environment. Innosoft B570 is also suitable for cleaning machines to use in the food industry.

Although Innosoft B570 was originally developed for stainless steel, it has become apparent that it also gives good results on other metals like copper and aluminum. Common white corrosion spots on aluminum can also effectively be removed using this product.

Innosoft B570 is also available with CE mark.

## EMERGO Metal Treatment

Our company is the international main distributor of the unique products Innosoft B570 and Innoprotect B580.

# Innoprotect B580

Innoprotect B580 is a neutral and mild cleaner and can successfully be used in combination with Innosoft B570.

As well as its cleaning action in removing the loosened oxides and contaminants, this product will also leave a protective layer to prevent fresh corrosion as much as possible. It is also suitable for the daily cleaning of lightly soiled surfaces. By using Innoprotect B580 frequents stainless steel will not rust.

Innoprotect B580 is also available with CE mark.

# Innogel B450

Innogel B450 is a powerful gel for removing rust and salts on stainless steel. Innogel B450 is easy to use, without mechanical work is Innogel B450 perfect for area's that are hard to reach. Despite Innogel B450 is called a pickling agent, it is biodegradable and therefore much more environmentally friendly than other pickling agents.

# Innopolish B520

Innopolish B520 is a liquid cleaner and polish that helps remove contamination and tarnish on metal surfaces and materials. It is suitable for use on stainless steel, nickel, copper, brass, chromium and aluminium.

Nonfood Compounds  
Program Listed A7  
(Registration 147692)

# Innospray B600

Innospray B600 is a ready-to-use cleaning spray that effectively removes marks and fingerprints from stainless steel. Innospray B600 leaves a shiny, streak-free finish and does not need to be rinsed or dried. Innospray B600 can also be used on other (water resistant) materials such as plastic and glass.

# Why unique?

Of course rust cleaners and pickling agents are sufficiently available. So what makes Innosoft and Innoprotect so unique?

- First of all: Innosoft B570 and Innoprotect B580 do work! Flash rust upon inox steel disappears smoothly.
- Innosoft B570 does not only work on inox, but also on other metals like copper, aluminum and even plain steels.
- Innosoft B570 organic, without danger to people and environment. Therefore it can be used in the food industry – contrary to the common pickling agents and rust cleaners.
- Innosoft B570 does not affect the oxide skin of the metal; Innosoft B570 is aggressive for rust, but mild for metals.
- By tensides that reduces the surface tension, Innosoft B570 penetrates into the pores of the inox steel, so one can counteract the so-called 'under deposit attack'.
- In combination with Innoprotect B580, Innosoft B570 prevents corrosion in the future as much as possible.

## Rust Removal

The power of Emergo Metal Treatment lies in removing rust from stainless steel and other non-ferrous metals. With our experience and unique products Innosoft B570 and Innoprotect B580 rust and other contaminants are efficiently removed. Your non-ferrous metal will be restored to excellent condition and after treatment with Innoprotect B580 it will be extra protected thanks to a protective layer.

## Service teams

Cleaning non-ferrous metals is a specialty job. This often means that as a client you don't possess the knowledge and/or manpower needed to perform a cleaning job. Emergo Metal Treatment has special service teams which consist of well trained, SCC certified employers with experience in specialist cleaning.

Innoprotect B580 and Innosoft B570 are used worldwide.

# STARTERKIT

If you want to test those unique products, you can order a starterkit. This starterkit consists of 250 ml Innosoft B570, 250 ml Innoprotect B580, a special sponge to apply the products, and a pair of gloves.

This starterkit is also available with 100 ml and 500 ml product.
